TUMBLING SCORING RANGES

Tumbling difficulty ranges/scores are determined using **3** components:

1. Synchronized* group skill (standing or running) to get into a range. This will determine the starting difficulty value of 6.0, 7.0 or 8.0. If 50% of the team does not perform a synchronized skill, score drops into the range directly below (see quantity chart for 50% requirements).
2. Difficulty of skills performed. Additional skills may increase the score within the established synchronized group skill range (6.0-7.0, 7.0-8.0, 8.0-9.0).
3. **Tumbling Composition Drivers (listed below) may contribute up to an additional 1.0 to the score.**

*Synchronized = exact same skill(s) at the exact same time from beginning to end by ALL members of the group. EX: Synchronized = 50% of team does a single handspring at the exact same time. Not synchronized = 25% of the team does a back handspring, other 25% does two connected back handsprings.

Note: Tumbling passes must land on both feet to receive credit. Example: Back handsprings which land in prone position would not count.

TUMBLING COMPOSITION DRIVERS

Synched Percentage of Team Participation – most/all of the team perform a synchronized skill(s) in the achieved range.

Cumulative Percentage of Team Participation – most/all of the team cumulatively perform skill(s) in the achieved range.

Combination of Skills – connecting additional skills to a pass listed in the range. EX: front walkover-cartwheel-back walkover, or toe touch-BHS, or front walkover-round off-whip-BHS-layout.

Variety of Skills – at least 2 **DIFFERENT** skill(s)/pass(es) are performed.

Clarity of Synchronized Group Skill – synchronized group skill was clearly performed with no additional/different skills by some members of the group and no athletes “marking” the skill.
