

## PLAYING VIDEO

1. For Albums that have video attached, you will choose Videos or Music after tapping on the album.

2. The available videos for that album will show as a menu. Remember that some albums do not have video elements, so the "Videos" option will not show up. Click the video, and the player will launch.

3. Note: Videos can only be watched on the Clementune app. They cannot be accessed or downloaded on a computer.
