# PLAYING MUSIC THROUGH THE CLEMENTUNE APP

1. To scroll tracks, simply tap the scrolling song title at the very bottom of the screen. It'll pull up a "switch to track" scroll that makes it easy to jump to a different song. Android users tap at the Top of the screen.

2. To "fast forward" or "rewind", simply tap the white circle in the time bar and drag it to the desired point.

3. On the Tempo Player screen, start adjusting the tempo by moving the slider left or right and watch as the "New BPM" readout displays your new BPM.   The original speed is on the left and the new speed is on the right.

4. The tempo adjustment range is ±50%.
